

preventpcp

Procurements of innovative, advanced systems to support **security in public transport**

What PREVENT PCP is?

PREVENT PCP is the project funded by the European Commission. It focuses on augmenting the security in public transport and public areas in the vicinity through innovative procurement of technology solutions that will allow timely automatic detection of potentially dangerous unattended items, identification and tracking of perpetrators, and advanced crisis management system.

Why is the project based on PCP?

Pre-Commercial Procurement (PCP) is an approach for Public Buyers to acquire research and development services (and under certain conditions related R&D results), that involves competitive development in phases, risk-benefit sharing under market conditions, and where there is a clear separation between the PCP and the deployment of commercial volumes of end products. The purpose of PCP is to steer the development of new innovations towards the needs of the public buyers.

What will be ensured through PCP?

DETECTION OF UNATTENDED ITEMS IN PUBLIC TRANSPORT

IDENTIFICATION AND TRACKING OF PERPETRATORS

TECHNOLOGY INTEROPERABILITY IN CRISIS MANAGEMENT SYSTEMS AND VIDEO MANAGEMENT SYSTEM

How can I join PREVENT PCP?
